INTRODUCTION

GetuIctandSecuritySolutions is a private company owned by a team of Information Technology Specialists found and officially established in Tanzania in 2017. The Company specializes in network design, installation and management, supply of ICT equipment's, Mobile Devices, CCTV camera Installation, Electric Fence Installation, Website Development, network maintenance, Security System and support services.

GetuIctandSecuritySolutions is a provider of Information Technology and Telecommunications systems. We specialize in high-performance and high availability solutions. Our consultants have varying specialties through advanced training programs from our several principals covering design, deployment and operations management.

Customer care commitment is a keyword for GetuIctandSecuritySolutions. We are constantly improving our efforts to maintain a high standard of quality in all aspects of our service towards our customers and partners. To that end we continuously invest in training and skills upgrading of our technicians and consultants.

GetuIctandSecuritySolutions focuses on High performance networks, Computer Hardware, Mobile devices, CCTV camera Installation, Electric Fence Installation, Website Development, Telecommunications Infrastructure Built-Out, Communications management systems and Non-stop computing infrastructure for e-Business build-out.

GetuIctandSecuritySolutions We are a company that offers our computer expertise to companies that are just starting to invest in technology and to companies that need to enhance their existing systems. is a resource for companies. Our purpose is to help clients build the most reliable and cost effective technology model that will meet and exceed their needs for the present and future

We have expertise in various ICT areas including but not limited to Supply of all ICT materials, Network Installation and Administration, Website Development and Hosting, Intranet Development / Implementation, Sales of Hardware and Software, Mobile devices, System Service, Troubleshooting and Support, Networking Computers, Consultation on Technology Issues, Systems Analysis, Phone Wiring & Installation. GetuIctSolutions is designed to enhance, combine and add additional benefits to local and regional companies.

SOLUTIONS

Supply of Computers/Laptop peripherals/Mobile devices

GetuIctandSecuritySolutions supply all computers peripherals like HDD, RAM, Laptops, laptop screen, battery, Adapter UPS and UPS batteries, Computer Power supply, Motherboard for laptop and desktop, Data Recovery, Phone Accessories power supply. Apart from that GetuIctSolutions supply ebeam interactive electronic boards and all accessories at reasonable price, also we do online shopping for all ICT accessories.

Preventive Maintenance

GetuIctandSecuritySolutions does systematic measurable technical assessment of a network/hardware/software using various methods, tools and IOS commands so as to obtain accurate information about a network/computer/Laptop/mobile devices and detecting weaknesses/slowness in a network/peripheral device. With this solution, our customers obtain real-time network fault analysis; know potential methods that hackers might use to attack their networks, network discovery, topology views and end-station tracking.

Network Optimization

We do this to help our customers make most of their resources hence obtaining most of their opportunities and improve their network quality by increasing network availability thereby reducing costs that the companies may incur due to unavailability of network resources.

Network Security

GetuIctSolutions information security solutions utilize internal methodology which includes assessment, design, validation, planning, implementation, and management. GetuIctSolutions understands the top business concerns around solutions like identity management, policy development, and incident response plans, as well as technology solutions like firewalls, intrusion detection, and strong authentication.

From business and compliance drivers to technology solutions, GetuIctSolutions can help bridge the gap between the expectations of the business and the realities of IT throughout the complete process of information security. We provide Network performance monitoring tools to assist Network administrators in managing complex networks. GetuIctSolutions uses industrial security vendors like Symantec, McAfee, Kaspersky, Cisco, SonicWALL etc.

Enterprise VoIP

Voice over Internet Protocol is a transmission technology for delivery of voice communications over IP networks such as Internet or other packet switched networks. VoIP systems employ session control protocols to control the set-up and tear-down of calls as well as audio codecs which encode speech allowing transmission over an IP network as digital audio via an audio stream. There are three common methods we use for connecting to VoIP service providers as outlined below.

- An Analog Telephone Adapter (ATA) connected between an IP network (such as a broadband connection) and an existing telephone jack.
- Dedicated VoIP phones which allow VoIP calls without the use of a computer.
- A softphone (also known as an Internet phone or digital phone) which is a piece of software that can be installed on a computer and allows VoIP calling without dedicated hardware.

LAN/WAN Design

GetuIctandSecuritySolutions designs, implements and manages WAN/VPN and LAN. We do structured cabling design and implementation for LAN, create VLANs to separate traffic between users hence limiting broadcasts over a network, designing and building state of the art Wireless networks using strong encryption algorithms and range boosted access points. We start from selecting appropriate equipment's needed such as routers, switches, and infrastructure planning.

Network Management

GetuIctandSecuritySolutions provides network monitoring and support to assist customers to properly manage their networks. We use different Engineers toolset for network monitoring which has different tools used to gather information about the current status of the network by constantly monitoring the network and gives a notification in case of outages for failing or slow components. We provide network support to our customers after signing a contract with them and we offer 24/7 support services.

Website Designing/Hosting

GetuIctandSecuritySolutions develops quick and quality websites for companies, government entities, NGOs and educational institutions who like to take the advantage of cyber presence by using the most effective way for them to get noticed with barely any increased expenses. Our hosting package is with a 99.99% available data center.

Domain Name Registration

A domain name gives you a unique identity of your own on the net, it adds credibility to your business or project and gives it a professional image. Once you own a domain you can then accommodate as many emails as you wish for various departments of your business or Enterprise. GetuIctandSecuritySolutions does the following:

- Private domain registration such as .com, .co.tz, .org, .or.tz, .go.tz, .net, .biz, .info etc.
- Domain locking to prevent unauthorized transfer of a domain.
- Domain transfer to direct a domain to an existing website.
- DNS management.

SALES INFORMATION

LIST OF SOME CLIENTS

S/N	Name of Customer	Services Rendered
	KIZIMKAZI GROUND PROJECT	Designing, installation and configuration of secure data network and interbranch connectivity,CCTV Camera installation, Electric Fence Installation
	JAMBO APPARTMENT	Design and installation of secure data network
	ELSAM	Vulnerability assessment
	NIMR	Designing and installation of LAN and n-computing devices and servers
	ELSAM	Network support and maintenance contract
		Supply & Service of Computer and Local Area Network
	NIMR	Periodic Maintenance and Services of computer Hard & Software
	ELSAM	Installation of Computer System and Maintenance of Hardware & Software
	MUSLIM UNIVERSITY	Design , Installation and Period Maintenance of Computer and LAN
	KIZIMKAZI GROUND PROJECT	Supply of UPS battery and computer Peripherals.
	KLEOS LAW ASSOCIATES	Website Development
	DESIRE INVESTMENT	Supplier of ICT and Network Equioment
